35 U.S.C. 112, first paragraph, requires the specification to be written in "full, clear, concise, and exact terms." The specification is replete with terms which are not clear, concise and exact. The specification should be revised carefully in order to comply with 35 U.S.C. 112, first paragraph. Examples of some unclear, inexact or verbose terms used in the specification are: to be found throughout the specification and abstract.

This application is in condition for allowance except for the following formal matters:

As above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the diode protection means connected between the supply and amplifier input of Sellnau et al. and Vickram et al.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to disclose connecting diodes between the respective power supply terminals of an amplifier and a node between feedback resistors in a negative feedback loop between the input and output of the amplifier as claimed.
